

ABSTRACT OF THE DISCLOSURE

- 5 A gasoline additive concentrate composition comprises a solvent, an
alkoxylated fatty amine, and a partial ester having at least one free hydroxyl group
and formed by reacting at least one fatty carboxylic acid and at least one polyhydric
alcohol. A fuel composition comprises gasoline and the gasoline additive
concentrate composition. A method of operating a gasoline internal combustion
10 engine comprises fueling the engine with the fuel composition and is effective in
reducing fuel consumption.
